

Health, Safety, and Environmental policy

Process Systems Limited (PSL) aims to provide and maintain a healthy and safe working environment. PSL's objective is to minimize the potential for occupational and environmental accidents and ultimately to achieve an accident free workplace.

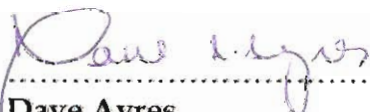

PSL recognizes and accepts the duty to protect the health and safety of all employees, customers, contractors, and members of the public who can be affected by its operations.

All employees will be provided with the equipment, information, training, and supervision necessary to implement the policy, and to achieve the stated objectives for health, safety, and environmental (HSE) management.

There will be regular HSE communication, awareness, and programs conducted for all employees and contractors, all of whom will be required to comply with PSL's HSE Policies and Procedures.

We will ensure compliance with relevant environmental, health and safety legislation, codes of practice, standards, and client HSE requirements.

Our HSE Management practices will be continually monitored and updated, particularly when changes in the scale and nature of our operations occur.
